**SOUTHAVEN
COMMUNITY DEVELOPMENT DISTRICT**

INTRODUCTION

The Southaven Community Development District ("District") is a local unit of special-purpose government created pursuant to and existing under the provisions of Chapter 190, Florida Statutes. Under Florida law, community development districts are required to take affirmative steps to provide for the full disclosure of information relating to the public financing and maintenance of improvements to real property undertaken by such districts. Unlike city and county governments, the District has only certain limited powers and responsibilities. These powers and responsibilities include, for example, construction and/or acquisition, as well maintenance, of the following improvements: master entrance and loop road; master stormwater system; master utility system; recreation and amenity center; entry feature and signage; landscaping, lighting, fencing and street trees; security; neighborhood infrastructure; and other related public infrastructure.

**AMENDED AND RESTATED DISCLOSURE OF PUBLIC FINANCING AND
MAINTENANCE OF IMPROVEMENTS TO REAL PROPERTY UNDERTAKEN BY
THE SOUTHAVEN COMMUNITY DEVELOPMENT DISTRICT**

Under Florida law, community development districts are required to take affirmative steps to provide for the full disclosure of information relating to the public financing and maintenance of improvements to real property undertaken by such districts. The law specifically provides that this information shall be made available to all persons currently residing within the District and to all prospective District residents. The following information describing the District and the assessments, fees and charges that may be levied within the District to pay for the financing and maintenance of certain community infrastructure is provided to fulfill this statutory requirement.

What is the District and how is it governed?

The District is an independent special taxing district, created pursuant to and existing under the provisions of Chapter 190, Florida Statutes (“Act”), and established by Ordinance No. 2014-22 enacted by the Board of County Commissioners of St. Johns County, Florida, which was effective on May 13, 2014. The District encompasses approximately 314 acres of land located entirely within the boundaries of St. Johns County, Florida. As a local unit of special-purpose government, the District provides an alternative means for planning, financing, constructing, operating and maintaining various public improvements and community facilities within its jurisdiction.

The District is governed by a five-member Board of Supervisors, the members of which must be residents of the State and citizens of the United States. Within ninety (90) days of appointment of the initial board, members were elected on an at-large basis by the owners of property within the District, each landowner being entitled to one vote for each acre of land with fractions thereof rounded upward to the nearest whole number. Elections are then held every two years in November. Commencing at such time as the following two conditions have been satisfied: i) six years have passed from the date of the initial appointment of Supervisors and ii) a minimum of two hundred fifty (250) qualified electors reside within the District, Supervisors whose terms are expiring will begin to be elected by qualified electors of the District. A “qualified elector” in this instance is any person at least eighteen (18) years of age who is a citizen of the United States, a legal resident of Florida and of the District, and who is also registered with the Supervisor of Elections to vote in St. Johns County. Notwithstanding the foregoing, if at any time the Board proposes to exercise its ad valorem taxing power, it shall, prior to the exercise of such power, call an election at which all members of the Board shall be elected by qualified electors of the District.

Board meetings are noticed in a local newspaper and conducted in a public forum in which public participation is permitted. Consistent with Florida’s public records laws, the records of the District are available for public inspection during normal business hours. Elected members of the Board are similarly bound by the State’s open meetings law and are generally

subject to the same disclosure requirements as other elected officials under the State's ethics laws.

**What infrastructure improvements does the District provide
and how are the improvements paid for?**

The District is comprised of approximately 314 acres located entirely within St. Johns County, Florida. The legal description of the lands encompassed within the District is attached hereto as **Exhibit "A."** The public infrastructure necessary to support the District's development program includes, but is not limited to: master entrance and loop road; master stormwater system; master utility system; recreation and amenity center; entry feature and signage; landscaping, lighting, fencing and street trees; security; and neighborhood infrastructure. These infrastructure improvements are more fully detailed below. To plan the infrastructure improvements necessary for the District, the District adopted an *Engineer's Report*, dated February 25, 2015, as supplemented by the *Engineer's Report*, dated March 25, 2015, and the *Amended and Supplemented Engineer's Report* dated November 4, 2016 (together, "Engineer's Report"). The Engineer's Report provides a basic description of all of the improvements contemplated for the completion of the infrastructure of the District (the "Capital Improvement Plan"). Copies of the Engineer's Report are available for review in the District's public records.

These public infrastructure improvements have been partially funded by the District's sale of bonds. On October 6, 2014, the Circuit Court of the State of Florida, in and for St. Johns County, Florida, entered a Final Judgment validating the District's ability to issue an aggregate principal amount not to exceed \$25,000,000 in Special Assessment Bonds for infrastructure needs of the District.

In total, the District has issued \$14,480,000 in Special Assessment Bonds to fund its Capital Improvement Plan. First, the District issued its Southaven Community Development District, Special Assessment Bonds, Series 2015A-1, in the amount of \$4,035,000 and its Southaven Community Development District, Special Assessment Bonds, Series 2015A-2, in the amount of \$3,520,000 (together, "Series 2015 Bonds"). Next, the District issued its Southaven Community Development District, Special Assessment Bonds, Series 2016A-1, in the amount of \$4,515,000 and its Southaven Community Development District, Special Assessment Bonds, Series 2015A-2, in the amount of \$2,410,000 (together, "Series 2016 Bonds", and together with the Series 2015 Bonds, "Bonds").

MASTER ENTRANCE AND LOOP ROAD

This improvement consists of: i) a 24-foot wide two-lane curb and gutter entrance roadway; ii) a 20-foot wide curb and gutter exit lane; iii) turn lane improvements from International Golf Parkway into the project; iv) landscaping and irrigation; and v) a loop road routed through the District which consists of both 24-foot wide and 20-foot wide two-lane curb and gutter roadways. The roadway improvements are owned and maintained by the District.

MASTER STORMWATER SYSTEM

The District has financed, designed and constructed certain master drainage improvements within and adjacent to the District boundaries. The master stormwater system includes the stormwater management facilities ("SMFs") #1, #1A and #2, outfall control structures, drainage structures, transmission pipes, and mass grading to ensure that the lands within the District will drain in accordance with the system design. The outfall control structures include the outfall pipes and associated end treatments. Transmission and equalizer pipes provide the interconnectivity required for the system to function as designed and includes the pipe end treatments. These improvements have been designed to St. Johns County and St. Johns River Water Management District ("SJRWMD") standards. These drainage improvements are owned and maintained by the District.

MASTER UTILITY SYSTEM

The District has financed, designed and constructed certain master potable water, master reuse water and wastewater utility facilities within the District boundaries. These completed improvements include the potable water mains, reuse mains, gravity sewer collection system, lift stations and the associated force mains that will convey the sanitary sewer flows from the development both onsite and offsite to the points of connection provided by St. Johns County Utility Department ("SJCUD"). The master utility system improvements have been designed, and constructed to SJCUD standards. SJCUD owns and maintains the potable water, reuse and sanitary sewer utilities.

RECREATION AND AMENITY CENTER

The Clubhouse and related improvements (including but not limited to restrooms, pool, playground equipment, active recreation area, parking, landscape and lighting, tennis courts, amenity center, pocket parks, recreational improvements and greenways) were completed. The District acquired the Clubhouse and related improvements, and now owns and maintain the recreation and amenity center improvements.

ENTRY FEATURE AND SIGNAGE

The District has financed, designed and constructed entry monuments, community signage, lighting, walls, fencing, landscape, hardscape and irrigation. No additional improvements of this type are anticipated to be funded by the District. The entry feature and signage are owned and maintained by the District.

SECURITY

The District has financed, designed and constructed a gatehouse and gates to monitor access to the District. The security facilities are owned and maintained by the District. At the discretion of the Board of Supervisors for the District, the guardhouse and gates may be manned at times by security personnel employed or retained by the District. Security personnel will

manually operate the gates, and may record driver information, vehicle destination, license plate information, and the date and time of vehicle entry/exit. However, security personnel will not restrict access of the general public within the District as the roadway improvements are public improvements and must remain open to the public.

LANDSCAPING, LIGHTING, FENCING AND STREET TREES

The District has financed, designed, constructed, and acquired landscape, fencing and street trees which are owned and maintained by the District.

NEIGHBORHOOD INFRASTRUCTURE

The District has financed, designed, constructed, and acquired certain infrastructure improvements for the neighborhoods within the District. These improvements include complete construction of the basic infrastructure for each neighborhood, including but not limited to: clearing and grubbing, earthwork, potable water, reuse, irrigation, water, and sewer utilities, internal roadways, grassing, and sodding. The internal roadways provide access throughout the residential area of the District and have been constructed to St. Johns County standards. The opinion of probable cost in the Capital Improvement Plan includes design, permitting and construction costs for a network of two-lane roadways providing access to each residence. The roadways and rights of ways are owned by the District. The water and reuse distribution improvements consists of the main underground transmission system necessary to service residents of the District, as required by the SJCUD and Florida Department of Environmental Protection ("FDEP"). The sanitary sewer collection improvements consist of the sanitary manholes, gravity sanitary sewer mains, sanitary lift station and sanitary force main required to serve residents of the District. These potable water, reuse, and sanitary sewer systems improvements have been designed according to the SJCUD and FDEP standards, have been dedicated to the County and are owned and maintained by the SJCUD.

Assessments, Fees and Charges

A portion of the master infrastructure improvements identified in the District's Capital Improvement Plan have been or will be financed by the District through the sale of its Bonds. The amortization schedules for the Bonds are available in the District's public records. The annual debt service obligations of the District must be defrayed by annual assessments on benefited property. Copies of the District's *Amended and Restated Master Special Assessment Allocation Report*, dated December 3, 2014, as supplemented by the *Final Supplemental Special Assessment Allocation Report*, dated March 25, 2015 and *Final Second Supplemental Special Assessment Allocation Report*, Series 2016, dated December 7, 2016 (together, "Assessment Methodology"), are available for review in the District's public records.

The Series 2015 Bonds and associated interest are payable solely from and secured by non-ad valorem special assessments levied against those lands within the District, as further described in **Exhibit "B"** attached hereto, that benefit from the design, construction, and/or acquisition and operation of the District's Series 2015 Project ("Series 2015 Debt Assessments").

The Series 2015 Debt Assessments are typically billed in the same manner as are county ad valorem taxes but may be billed directly by the District. The Series 2015 Debt Assessments are levied in accordance with the District's Assessment Methodology and represent an allocation of the costs of the Series 2015 Project to those lands within the District benefiting from the Series 2015 Project.

The Series 2016 Bonds and associated interest are payable solely from and secured by non-ad valorem special assessments levied against those lands within the District, as further described in **Exhibit "C"** attached hereto, that benefit from the design, construction, and/or acquisition and operation of the District's Series 2016 Project ("Series 2016 Debt Assessments" and together with the Series 2015 Debt Assessments, "Debt Assessments"). The Series 2016 Debt Assessments are typically billed in the same manner as are county ad valorem taxes but may be billed directly by the District. The Series 2016 Debt Assessments are levied in accordance with the District's Assessment Methodology and represent an allocation of the costs of the Series 2016 Project to those lands within the District benefiting from the Series 2016 Project.

The Debt Assessments described above exclude any operations and maintenance assessments ("O&M Assessments") which may be determined and calculated annually by the Board and are levied against all benefitted lands in the District. A detailed description of all costs and allocations which result in the formulation of assessments, fees, and charges is available for public inspection upon request.

The Capital Improvement Plan and financing plan of the District as presented herein reflect the District's current intentions, and the District expressly reserves the right in its sole discretion to change those plans at any time. Additionally, the District may undertake the construction, reconstruction, acquisition, or installation of future improvements and facilities, which may be financed by bonds, notes, or other methods authorized by Chapter 190, Florida Statutes.

Method of Collection

Except as discussed above, the District's Debt Assessments and/or O&M Assessments may appear on that portion of the annual real estate tax notice entitled "non-ad valorem assessments," and will be collected by the St. Johns County Tax Collector in the same manner as county ad valorem taxes. Each property owner must pay both ad valorem and non-ad valorem assessments at the same time. Property owners will, however, be entitled to the same discounts as provided for ad valorem taxes. As with any tax notice, if all taxes and assessments due are not paid within the prescribed time limit, the tax collector is required to sell tax certificates which, if not timely redeemed, may result in the loss of title to the property. The District may also elect to collect the assessment directly.

This description of the District's operation, services and financing structure is intended to provide assistance to landowners and purchasers concerning the important role that the District plays in providing infrastructure improvements essential to the use and development of this

community. If you have any questions or would simply like additional information about the District, please write to or call the: District Manager, Southaven Community Development District, 2806 North Fifth Street, Suite 403, St. Augustine, Florida 32084 or call (904) 436-6270.

The information provided herein is a good faith effort to accurately and fully disclose information regarding the public financing and maintenance of improvements to real property undertaken by the District and should only be relied upon as such. The information contained herein is, and can only be, a status summary of the District's public financing and maintenance activities and is subject to supplementation and clarification from the actual documents and other sources from which this information is derived. In addition, the information contained herein may be subject to change over time, in the due course of the District's activities and in accordance with Florida law. Prospective and current residents and other members of the public should seek confirmation and/or additional information from the District Manager's office with regard to any questions or points of interest raised by the information presented herein.

IN WITNESS WHEREOF, this *Second Amended and Restated Disclosure of Public Financing and Maintenance of Improvements to Real Property Undertaken* has been executed as of the 18th day of December, 2018, and recorded in the Official Records of St. Johns County, Florida.
